## **EDELRID ACE: Ultralight High-End Climbing Harness**

**The ideal partner for testing your limits**

**A light weight matters. This is the concept behind the high-performance ACE climbing harness. which combines a minimum weight and pack size with maximum freedom of movement and wear comfort. You'll barely notice the harness and can fully focus on what really matters even on the most challenging of climbs.**

Thanks to adjustments to the material and the extremely thin, length-adjustable bum straps, the updated version of the EDELRID ACE climbing harness is slightly lighter once again while also featuring a more stable and durable waist belt. This offers an incomparable wear feel. As with its predecessor, the design is based on 3D-Vent Lite technology, which enables the minimal weight, compact pack size, maximum freedom of movement, and extraordinary hanging and wear comfort. PES and Dyneema® straps evenly distribute any forces across the entire harness width without being bulky. This intricate construction uses carrier material made from monofilament yarns, which offer impressive breathability. As a result, the ACE efficiently wicks away sweat and body heat. The stable mesh on the inside and enhanced outer fabric make the waist belt and leg loops particularly robust and durable.

The butterfly shape of the waist belt also helps to optimally distribute loads and ensure excellent hanging and wear comfort. The straps on the waist belt and leg loops furthermore become wider as the harnesses increase in size so as to offer the optimum

fit and appropriate comfort in all versions. Equipment can be organized on the five gear loops plus there are a further two attachment options for ice screw clips. The ACE is the perfect climbing harness for all those who really want to push themselves on rock, ice, or in alpine terrain.

## **Technical details**

- Butterfly shape for enhanced hanging comfort and optimum load distribution
- 3D-Vent Lite technology: PES and Dyneema® webbing integrated into the waist belt and leg loops ensures a wide force distribution and maximum breathability without adding bulk
- Stable mesh on the inside and robust outer material for enhanced durability
- Waist belt can be fully opened using the self-blocking, aluminum Slide-Block buckle for a comfortable and secure harness fit and minimal weight
- The waist belt and leg loop straps become wider as the harnesses increase in size
- Central ring made from Dyneema® on the inside and comprehensive polyamide in a kernmantle construction
- Parallel tie-in points on the hip and leg loop bridges with textile abrasion protection made from a mixture of HMPE and polyamide
- Red wear indicator in the waist belt strap
- Light bum straps made from round elastic
- Five gear loops and two attachment options for ice screw clips
- The rear gear loops on the XS to S versions are slightly smaller
- Weight: 274 g (size M)
- Sizes: XS to L

### **About EDELRID:**

Since its establishment in 1863, EDELRID has developed into a leading manufacturer of personal protective equipment (PPE), especially ropes and climbing equipment. EDELRID products are developed for mountaineering and climbing. Furthermore, EDELRID climbing equipment is used for professional purposes, for example for work safety, industrial climbing, tree care, mountain rescues, and rescues from heights. The company is particularly characterized by outstanding innovation and its focus on sustainability. EDELRID specializes in the development

and production of ropes, and brought the first bluesign® certified ropes to the market. All product development activities take place at the head office in the German town of Isny im Allgäu, where 60 percent of all products (including 100 percent of ropes) are produced. This guarantees not only exceptional quality and functionality, but also ongoing innovation. The renowned climbing shoe brand Red Chili has been part of EDELRID's product portfolio since 2017. Since 2022, the EDELRID Group has also included avalanche backpack manufacturer ABS Sports + Protection GmbH & Co. KG.
