## **EDELRID REVOLT: Ultralight and Ultrastrong**

**Versatile technical ice tool for demanding mountaineering activities**

**The EDELRID REVOLT is a technical ice tool that impresses with its ultralow weight, its compact size, and its strength. It masters steep cruxes as well as icy couloirs and longer glacier and firn passages. This makes the REVOLT the perfect lightweight partner for demanding mountain tours, ski mountaineering, and classic north face climbing.**

The REVOLT is a versatile ice tool with a pick that has been specially designed for mixed terrain and that adeptly combines maximum stability with efficiency. Its consistent thickness of 4 mm makes it particularly stable. The pick has been designed without teeth in the area where the finger and palm lie when it is gripped. This not only enables the REVOLT to sit comfortably in the

hand when used as an ice axe for support in combination with the ergonomically shaped head but also protects the user's gloves. The cut-out is designed to effortlessly hold even large carabiners.

### Information for immediate publication

The slightly curved, anodized aluminum shaft with a length of 45 cm contributes to the ice tool's light weight and compact design. It is also ergonomically shaped and has a sandblasted surface, enabling the REVOLT to be securely and easily held and optimally placed both with and without gloves. The ridges on the section of the shaft that is held provide even greater grip. The finger rest supplied furthermore provides the option of a second hand position when climbing in steep terrain.

With its spike-like tip and sophisticated shaft geometry, the REVOLT effortlessly penetrates the snow when used as an ice axe for support while the integrated cap prevents snow from getting into the shaft. All conventional carabiners fit in the large carabiner opening, enabling versatile use.

Thanks to the modular design, the REVOLT is compatible with all technical attachments for the EDELRID RAGE and RIOT ice tools and can be specifically tailored to different conditions and areas of use.

### **Technical details**

- Aluminum shaft for a very low overall weight (438 g)
- Compact size thanks to the short length (45 cm)
- Compact 4 mm pick made from corrosion-resistant steel for demanding mixed terrain and classic north face climbing
- Ergonomically shaped head section: sits optimally in the hand for good control

### Information for immediate publication

- Sandblasted, anodized shaft for perfect grip plus ridges on the section of the shaft that is held for even greater grip (e.g. when striking)
- Large cut-outs for carabiners in the head and at the end of the shaft
- Shaft with a spike-like 'tip' in the lower section and an integrated cap to prevent the penetration of snow
- Compatible with all technical attachments for EDELRID ice tools to enable customized adaptation to different conditions and areas of use (exception: accelerator not compatible with the REVOLT)
- All EDELRID ice axes plus the REVOLT and RIOT have the same shaft profile for compatibility with the finger rest (modularity)
- Finger rest and Allen key included

#### About EDELRID:

Since its establishment in 1863, EDELRID has developed into a leading manufacturer of personal protective equipment (PPE), especially ropes and climbing equipment. EDELRID products are developed for mountaineering and climbing. Furthermore, EDELRID climbing equipment is used for professional purposes, for example for work safety, industrial climbing, tree care, mountain rescues, and rescues from heights. The company is particularly characterized by outstanding innovation and its focus on sustainability. EDELRID specializes in the development and production of ropes, and brought the first bluesign® certified ropes to the market. All product development activities take place at the head office in the German town of Isny im Allgäu, where 60 percent of all products (including 100 percent of ropes) are produced. This guarantees not only exceptional quality and functionality, but also ongoing innovation. The renowned climbing shoe brand Red Chili has been part of EDELRID's product portfolio since 2017. Since 2022, the EDELRID Group has also included avalanche backpack manufacturer ABS Sports + Protection GmbH & Co. KG.
